

I'm an experienced full-stack developer and quick learner. I'm looking to work with a passionate and high-growth team to build great solutions for customers' challenging problems.

Work Experience

Senior Software Engineer | iCodice, LLC Feb 2019 - Present

- Designed, built and tested products & systems across a wide-array of technologies and industries (including healthcare, legal, food and real-estate).
- Initiated efforts to migrate legacy applications to .NET Core and React platform.
- Lead the design & architecture of all back-end systems.
- Review code of junior developers.

★ A Few Notable Projects

Orthodontic CMS + Ordering Portal (.NET Core API, React)

Designed and developed an online platform consisting of multiple portals, mobile apps and integrations. Streamlined multiple processes into an extensible, scalable and fully integrated system. - HIPPA compliant, Patient/Case management, Automated Doc Generation.

SavorWe - Private Chef Booking App

Worked directly with the founders to build a scalable MVP app for their initial launch and create successful feature upgrades. Developed a hybrid mobile app on Flutter, implemented a ML menu recommendation system and booking management admin portal.

Product Team Lead | Grapecity Mongolia, LLC* Aug 2008 - Jan 2018

↑ Senior Developer <- Developer

- Maintain, support & lead active development on banking products.
- Modified existing software systems to enhance performance and add new features.
- Mentored interns and junior software developers through training, design reviews and code reviews.
- Drafted design objectives and system design documents.
- Regularly communicate and manage expectations with clients and stakeholders.
- Lead an agile and fast-paced team of 8 in-house developers.

★ A Few Notable Projects

"Most" - Payment Processor for Inter-bank Transaction (C#, Oracle)

Designed and developed the application server that is fully manageable, configurable and scalable.

Virtual Bank - Comprehensive solution for delivering banking services using the web and smart devices (ASP.NET MVC, Oracle, Swift)

Developed the back-end server and web portal.

*Provider of largest FinTech solution that is used by the National Bank of Mongolia that oversees all transactions and banking systems
