Work History

2020-07 - Current

Full Stack Web Developer

Rock Solid Marketing, MILDURA

- Developed efficient and maintainable software according to business objectives and needs of clients.
- Used Javascript, SQL and HTML to develop app-solutions.
- Maintained complex technology infrastructure and collaborated with product team to implement new features and strategically plan for future products.
- Designed testing protocols to locate issues within system.

- Liaised with rebranding experts to optimize websites for increased conversion rates.
- Reviewed code, debugged problems, and corrected issues.
- Developed functional databases, applications and servers to support websites on back-end.
- Oversaw and implemented automated build and deployment pipelines.
- Boosted network, system and data availability and integrity through preventive maintenance and upgrades.
- Worked with back-end developers to design APIs.
-

2019-01 - 2023-01   **Lead Developer**

DeveloperLook, Ruislip

- Designed and maintained integrated requirement traceability matrices to verify development performance consistency across teams and projects.
- Interfaced with front-end and back-end development teams to develop unified product, smoothing out coding conflicts before problems arose.
- Spearheaded creation of knowledge transfer sessions, verifying successful communication of information between internal and external teams.
- Developed software for desktop and mobile operating systems.
- Consolidated junior developer input on new projects into comprehensive forecasts, addressing task-level estimates and dependencies.
- Interfaced between high-value customers and junior developers, encouraging use of client feedback in software updates.
- Tested software products for strong functionality and optimization.
- Recruited in-demand talent to expand and diversify development staff.
- Developed testing strategies for web applications, integrating both industry-wide best practices and internal business goals into final designs.
- Pioneered new methods of code review to incorporate wider range of voices.
- Led version control efforts for organization, employing public and open source repositories.
- Created novel method of monitoring product health, incorporating metrics such as end-user satisfaction and technical fault statistics.
- Translated design personnel's ideation into concrete development frameworks for use in web application software.
- Managed a team of 5 junior engineers on projects in the web development field.
- Directed multi-national team of junior developers, integrating disparate levels of experience and technical knowledge into cohesive efforts.
- Collected and analyzed client requirements, incorporating business goals and budgetary concerns into project proposals.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.

Education

2016-01 - 2021-10   **Bachelor of Science: Computer Science**
